okay i have a particular gripe with this one bc
ik a lot of people's first impression with the shape
of hair is Ebert/Karkat but HEAR ME OUT-- i love
the idea of troll/human kids as much of the next guy
(and i have several myself), i don't think they would jump
into experimenting with hybrids right away

im sure you are aware of the similarities
between June & Kanaya's heads, but if you
observe my **HELPFUL DIAGRAM** you will
see how this grub's hair most resembles
Kanaya's besides the obvious 3 points
